§7-243.

If any radiation escapes from a low-level nuclear facility into the environment, the low-level nuclear waste facility permit holder shall:

- (1) Notify the Department promptly of:
 - (i) The name of the radioactive substance involved;
 - (ii) The quantity of the radioactive substance released;
 - (iii) The intensity of the radiation released; and
 - (iv) The composition of all radionuclides of the radioactive substance in terms of constituent weights; and
- (2) Provide any additional information that the Department requests.
